

New Automated Airport Parking System

Texarkana Regional Airport will soon start transitioning to a fully automated parking system. This system will be very similar to other airport parking systems. The customer will enter the parking area through an automatic gate arm system and receive a parking ticket and will pay as they leave.

Upon leaving the parking area, the customer will pay by inserting the parking ticket and **credit card (ONLY)** into the exit pay station. You will leave through the automated gate arm system.

CASH PAMENTS will only be accepted in the Administration Building #24.
